## ABSTRACT

Therapeutic or preventive agents for ischemic nerve injury containing as the active ingredient compounds represented by the general formula [2]:

$$\begin{array}{c} \text{Me} \rightarrow \text{O} \\ \text{HO} \rightarrow \text{O} \\ \text{R}^2 \rightarrow \text{R}^5 \end{array}$$

$$\begin{array}{c} \text{Me} \rightarrow \text{O} \\ \text{R}^2 \rightarrow \text{R}^5 \end{array}$$

$$\begin{array}{c} \text{Me} \rightarrow \text{O} \\ \text{R}^2 \rightarrow \text{O} \\ \text{R}^1 \rightarrow \text{O} \rightarrow \text{O} \\ \text{R}^4 \end{array}$$

$$\begin{array}{c} \text{Me} \rightarrow \text{O} \\ \text{R}^5 \rightarrow \text{O} \\ \text{R}^5 \rightarrow \text{O} \\ \text{R}^5 \rightarrow \text{O} \\ \text{R}^5 \rightarrow \text{O} \\ \text{R}^6 \rightarrow \text{O} \\ \text{R$$

wherein  $R^1$  and  $R^4$  are each independently hydrogen, carboxy, or alkoxycarbonyl; and  $R^2$  and  $R^5$  are each independently hydrogen, hydroxy group, or acyloxy group.
